Netbook Edition

Linpus has enhanced the MeeGo netbook user interface with improved categorization and the addition of more social networks in Mzone.

Other enhancements:

- Extremely fast boot – Less than 10 seconds.
- Online support – Linpus commercial grade LiveUpdate function delivers device-specific patches, upgrades and new applications to your system.
- Media Player – Added support for audio and video streaming.
- Power management – Advanced settings and options for idle mode and auto-suspend mean power savings of around 15 to 20%.
- Network Manager – More 3G modems and device-to-device file transfer (ad-hoc), VPN, PPPoE and WPA2-enterprise support.
 - * Linpus Windows Data Applications – If you have dual-boot with Windows, these applications help you view Outlook data, music and videos.
 - * Peripheral support – Extensive support especially for graphics, including: the full series of Intel graphics, most of NVIDIA and ATI.
- Input method - More user friendly multi-language input method and international keyboard support through iBus.
- File Manager – A Windows-like experience means that the partitions of USB drives are now alphabetically

Linpus and MeeGo™

Linpus was a key OSV in the Moblin portion of the MeeGo project for more than two years, pioneering a number of notable achievements:

- Acer Aspire One was the first product to ship with Moblin™-based technology inside.
- The fastest OSV to have a commercial edition based on Moblin 2.0 with the Moblin UX
- Enhanced social networking – Linpus' changes to the social networking application in M-Zone improved the delivery of online information.
- 2010 - Linpus Lite Moblin-based version with Linpus enhancements successfully shipping on some of the world's leading OEM's netbooks and notebooks.
